Frontend Developer | 10/2024 – 05/03/2025

- Developed scalable front-end applications using **Next.js**, **Hero ui**, and **Tailwind CSS**. Delivered projects on time, collaborating with backend teams for seamless API integration. Implemented **Redux Toolkit** and **Redux-thunk** for efficient state management, enhancing performance and user experience. Optimized development with scalable and maintainable code practices.

PROJECTS:

Enterprise Resource planning(ERP) Application , UAE (Cruise Motors)

Oct-2024 - March-2025

- Designed and developed a comprehensive **ERP system** tailored for a motor sales and modification company operating across the Middle East and Africa.
- Built modules covering critical business functions, including **Finance, Management, CRM, Logistics, HR, IT & Cybersecurity, Warehouse & Operations, Marketing, Demand, Legal, Procurement, Quality Assurance, and Administration.**
- Implemented features to streamline workflows, enhance operational efficiency, and improve cross-department collaboration.
- Focused on customization and scalability to accommodate unique business requirements for motor sales, modifications, and distribution.
- Contributed to improved financial tracking, supply chain management, and customer relationship management, ensuring seamless operation across multiple regions.

Lacrosse, USA (Debut infotech pvt ltd india)

April-2024 - Sep-2024

- Developed a comprehensive lacrosse game website and web application, featuring distinct functionalities for **admin and user roles.**
- Designed and implemented the front-end architecture using **Next.js, Redux-Saga, TypeScript, and Material-UI (MUI)** for a seamless and responsive user experience across all devices.
- Created a visually appealing and **user-friendly interface** for the website, ensuring intuitive navigation and accessibility.
- Developed separate modules for admin and user roles, each with tailored functionalities to meet specific needs.
- Admin functionalities included content management, user management, and detailed analytics and reporting tools.
- User functionalities included game participation, progress tracking, and personalized recommendations based on user activity.

Catalyst Playbook Academy, USA (Debut infotech pvt ltd india)

Oct-2023 - March-2024

- Developed an innovative web application tailored for Rugby players, aimed at enriching their skills, tactical knowledge, and game insights through flashcards utilizing the Space Repetition Algorithm. The app displays these flashcards in a repetitive mode to enhance learning efficiency. **Lead, mentor, and manage a high-performing marketing team,** fostering a collaborative and **results-driven** work environment.
- Designed and implemented the front-end architecture using **Next.js, Redux-Saga, TypeScript, and Material-UI (MUI)** etc to ensure a seamless and responsive user experience across various devices.
- **Collaborated** closely with **cross-functional teams**, including designers, back-end developers, and QA testers, to deliver a **high-quality product.**
- Integrated advanced features to enhance the user interface and user experience, catering to the specific needs of Rugby players.
